

### REMARKS

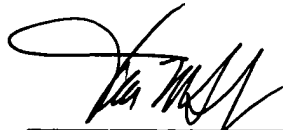

By this Supplemental Amendment, applicant seeks to make an additional minor correction to the amended claim to provide proper antecedent basis. In addition, applicant would also point out that with respect to the brief overview of the claims provided in the first paragraph on page 8, and in particular the reference to Claims 32-42, and due to the addition of several dependent claims, the claim references between the old and new claims is not totally accurate. In particular, new Claims 33, 34 and 37-42 correspond directly to former claims 19, 20 and 22-26, respectively with Claims 38 and 39 referring to the two alternate embodiments of former Claim 23. New Claims 33 and 35 were added to indicate that the main part and frame are composed of photosensitive glass, and Claim 36 was added to define the fact that the X-ray absorbing layer covers all surfaces of the partitions and the frame.

In view of the foregoing, and for the amendments and arguments advanced in the Amendment in Reply to the First Office Action filed August 28, 1995, it is respectfully requested that

the application is in order for allowance, and such action at an early date is earnestly solicited.

Respectfully submitted,

OLEG SOKOLOV
